

WE CAN'T MANUFACTURE THESE NUMBERS

Managing IT today can feel like an uphill battle, especially if you work in manufacturing. From staying current on regulations to managing patches, it's a lot for one team to manage. The right technology partner can be the difference between making and losing money.

CYBER RISKS

Top Worldwide Business Concerns in 2024

The amount of money lost to compromised business emails

The cost of cybercrime for U.S. businesses

The percentage of company networks cybercriminals can penetrate

Of SMBs not prepared to recover from the damages of a cyberattack

MANUFACTURING: A TARGETED INDUSTRY

Top industry affected by ransomware in 2023

Attacks in the manufacturing industry increased by 53%

BUT WHY DO THEY GO AFTER YOU?

- ✓ Your data is valuable
- ✓ Complex supply chains involving multiple parties are vulnerable
- ✓ Increased digitization
- ✓ Lack of cybersecurity
- ✓ Financial gain

90% of manufacturers are also ill prepared with poor network perimeters.

A BIG BURDEN FOR SMALL BUSINESS

42% are experiencing **cyber fatigue**, a sense of apathy toward proactively defending against digital attacks.

43% of all data breaches involve small and medium-sized businesses

Only 14% of small businesses are prepared to defend themselves against a cyberattack

54% say **cyberattacks** are too advanced for their IT team to handle on their own

Learn how we can help protect your manufacturing business today!
